

FOR IMMEDIATE RELEASE

Renown Weight Loss Slashes Prices Across All Programs by 5% or More

New Pharmacy Partnership Enables Significant Cost Savings for Customers

Dallas, TX – January 24, 2025 – Renown Weight Loss is thrilled to announce a significant price reduction on all its weight loss programs, effective immediately. Thanks to a new strategic relationship with a leading pharmacy partner, Renown Weight Loss has been able to lower its costs, and in turn, pass these savings directly to its customers with a minimum reduction of 5% on all services.

Programs Benefiting from the Price Reduction Include:

- **Semaglutide Programs:** Known for its effectiveness in managing weight, this program now offers even more value to those looking to achieve their health goals.
- **Other GLP-1 Agonists:** Customers can now access these cutting-edge treatments at a reduced cost, making weight management more accessible.
- **Kisspeptin Therapy:** This innovative approach to weight loss is now more affordable, providing an alternative for those seeking new methods.
- **Lipotropic Skinny Shots:** Designed to boost metabolism and fat burning, these shots are now part of the savings initiative.
- **PhenterPlus:** Combining the power of appetite suppression with increased energy levels, this program is now more budget-friendly.

"By securing this new pharmacy partnership, we're not just reducing our own costs; we're ensuring that our clients benefit from these efficiencies. Our mission has always been to make effective weight loss solutions accessible to as many people as possible," said Christina Valetutto, Director at Renown Weight Loss. *"This price reduction is our way of expressing gratitude to our customers for their continued trust and support."*

This price adjustment will apply to both new and existing customers, ensuring that everyone can take advantage of the reduced rates. Renown Weight Loss is committed to transparency and will continue to explore ways to enhance customer value without compromising on the quality of service or product efficacy.
